

NAUTIC CLEAN®

25

750 ml
25oz

Durable water-repellent
Improves all-weather visibility and safety.

Hydrophobic glass treatment

Properties

Hydrophobic glass treatment modifies the surface tension properties of glass by making it hydrophobic. An extremely thin film will form on the treated surface. This makes water to run off very quickly, significantly improving visibility.

ADVANTAGES:

- Can be used on all types of glass, windscreens, windows, mirrors, shower screens...
- Durable water-repellent (from several weeks to several months).
- Improves all-weather visibility and safety.
- Makes it easier to remove frost, salt, mud and insects from treated surfaces.
- Quick drying.

ATTENTION

Flammable product. Keep away from sparks, naked flames and all other sources of ignition. Do not smoke. Do not apply on hot surfaces. In very hot weather, dampen the surface first.

Instructions for use

Respect usual safety measures for the use of chemical products and wear the appropriate individual protection equipment.

Clean and dry the surface before applying the coating to ensure that it is free of all traces of grease and limestone. We recommend using our **19 Multi-surfaces cleaning foam** for this cleaning/degreasing phase. Spray **Hydrophobic glass treatment** onto a dry microfibre cloth. Spread the product evenly by making small, firm, circular movements. Let it dry. A greasy film will form. Wipe off this film with a clean microfibre to obtain an even film or by spraying water over it and wiping it off with a microfibre.

Technical specifications

Physical state: liquid **colour:** colourless **pH:** n/a **density:** ca.0,76

Storage: keep tightly closed and protected from cold, frost, UV rays and heat in a ventilated place.
